Senior Web Applications Developer

Illinois Housing Development Authority (IHDA), one of the Nation's preeminent Housing Finance Agencies and one of the State's ten largest financial institutions, is currently seeking a Senior Web Applications Developer to build upon their 50+-year leadership in housing finance.

The primary responsibilities of the Web Application Developer Lead are Lead the creation of business solutions by developing, implementing, and maintaining web applications. Collaborating with design teams and stakeholders to analyze and define site objectives, system features and functionality. Lead activities to develop, enhance, and maintain custom in-house web applications and modules that interface to and augment the business systems. Performs the typical functions of the Developer role, but also puts together product concepts, architecture solutions, performs some creative design, rapid prototyping, and high-level, technical review/analysis of new technologies. Defining project technical design methodology and recommended toolsets to meet project objectives. Maintains knowledge of current technology trends and how they can be applied at IHDA. Supporting team members by providing technical guidance on project software development.

Education and Experience Requirements:

- Bachelor's degree in Computer Science or Information Technology preferred
- Minimum 5 years of experience with Microsoft technologies including C#, VB.NET, ASP.NET, XML, scripting languages including VBScript/JavaScript and HTML
- Proficiency in object-oriented programming and experience in applying latest design patterns
- Demonstrated understanding of solution architecture and design patterns
- Experience in web application development and deployment tools (e.g. GIT, Visual Studio team services and source control), testing, process and configuration management
- Experience with one or more database platforms (MS SQL Server)
- Experience in backend integration and usage of REST APIs
- Effectively communicates and documents technical architecture and solutions to internal peer groups as well as other groups
- Ability to work independently and meet time-sensitive project deadlines
- High-energy positive self-started individual with strong initiative and self-motivation skills

Excellent benefits package, including 401 (k); immediate vesting.
